

Discover the best smart locking solution for

Click & Collect

- 24/7 service to customers, visitors, guests
- Reduce operating costs while increasing revenue
- Dispense, sell, rent or return with limited employee interaction required

The future of Click & Collect is here.

Using smart lockers for customer services has unprecedented possibilities. With very limited staff intervention, products can be rented, sold, lent out and taken back, collected or returned, or dispensed. Customers get extra service and no longer have to queue and employees have their hands free for other tasks.

Companies can easily lend or issue company assets - e.g. company clothing, protective equipment or tools. But also for gyms or pharmacies, for example, there are great benefits to be gained from using smart lockers.

With the Keynius Smart Locking Solutions, the possibilities are endless. And all with the same, flexible deployable system.

Keynius
smart locking reinvented

Why is Keynius the best asset management solution?

1 Use locker walls in the most efficient way.

- Use lockers indoors or outdoors for 24/7 product distribution and returns
- Add payment options for direct selling
- Multiple functions can be united in one locker wall: Storage, Click & collect, Parcel, Vending, IT & asset and Visitor
- Monitor locker use in real time for optimal usage

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Cloud operated: safe, secure, automatically updated, no servers required
- 3rd party software integration, a.o. with your webshop
- Enhance locker cabinets with features such as USB-A & USB-C power connection, cabinet and/or door lights, RFID and more

USE CASE Click & Collect, ING HQ Amsterdam.

Dispense and sell office supplies

ING HQ Amsterdam makes it easy for its employees and service desk by issuing frequently used office supplies via lockers. By linking Keynius to their own employee management system, it tracks exactly whether or not employees have to pay extra for items and ING can also settle this directly and automatically. The service desk is automatically notified when stock needs to be replenished.

Smart locking reinvented.

Keynius is the new global standard in possibilities for 'anything with a lock'. We invent and sustainably develop smart, innovative and high-tech solutions that are easy to operate and fun to use, to help companies become more profitable, help employees make their jobs easier, and help users to keep what is precious safe. Check our video's on www.youtube.com/@keyniusEU/

Wondering if this could be for you? Of course we'd really love to hear from you.
